In article the all-legal problem of formation of the modern constitutional state as the social, political and legal phenomena reflected in historical traditions of legal system of the states and world experience of transfer of political and legal culture in development of society is staticized.

Key words: state, political power, concept of the state, phenomenon of the state, European political theory.

In article the all-legal problem of formation of the modern constitutional state as the social, political and legal phenomena reflected in historical traditions of legal system of the states and world experience of transfer of political and legal culture in development of society is staticized. Features of approaches to the concept of the modern constitutional state of the French contemporaries on a cut of political doctrines in the light of new methods of knowledge are considered: structuralism, system analysis, functional analysis, methodological syncretism, etc.

The questions of theoretical and practical character connected with evolution of legal statehood, formation of prerequisites and influence of system of factors of formation of the modern constitutional state in concrete historical conditions are of particular importance.

New approaches to research of a phenomenon of the state as historical, political, social and legal phenomena, in particular in France (since the middle of the XX century), it was realized in a formulation and further development of a number of original concepts of political doctrines and the theory of the state. It broadened the sphere of further development of the general theory of the state, and also political science.

Addressing to doctrines of political science of France of the twentieth century, it is possible to observe, the palette of influence of the French political science and a number of modern French schools of sciences on formation of the modern concept of the state as political, social and legal phenomenon is how wide.

E-mail: mashekuasheva@mail.ru

One of the most acute problems of modern Russia is the spread of extremism. Everything becomes more organized his character, increases the level of violence is increasing the number of crimes related to extremism. Increasingly extremism manifests itself not only in all spheres of society, but also in the political, economic, social and religious activities. The reasons for the spread of extremism are as common reasons inherent in crime in general (social, economic, and political factors), and specific, related to the specific conditions of the existence and characteristics of the individual social groups. The problem of extremism in our country for a long time was ignored. In criminal law qualified as hooliganism and extremist manifestations, including on national and religious grounds.

Key words: religious extremism, political extremism, combating international level, the functioning of society.

PREJUDICE IN CRIMINAL PROCEEDINGS

E-mail: mashekuasheva@mail.ru

Over time, the legislation of the Russian Federation made significant changes, one of which is the inclusion in the Code of Criminal Procedure of prejudice. However, this procedural provision proved far from perfect, instead of solving the problems associated with the use of prejudice, it even aggravates them by proving on criminal cases. There is no single definition of the Russian legislation in our time has no prejudice. However, if we consider the history of the origins, it should be noted that the first mention of prejudice found in Roman law.

Key words: prejudice, law, criminal prosecution, procedural law, the state duties.

**THE ORDER OF CREATION AND FUNCTIONING OF FRONT DIVISIONS
PATROL-SENTRY DUTY OF POLICE**

State Crime is one of the important characteristics of the development of society, a kind of indicator of their well-being. Crime in general and women in particular, related to the specific historical conditions of the life of society, that is dependent on the political, economic, social, demographic, cultural and other people's lives. Currently, the problem of female criminality attracts attention not only of scientists, lawyers and practitioners, and the general public. Every year there is an increase in the number of convicted women. If in 2000 the proportion of female offenders in the total number of convicted persons was 10.6 %, while by 2014 this figure had increased to 15.1 %. Unfortunately, the moral and spiritual issues in recent years in the community paid little attention. Young women from poor and needy families virtually no access to the fashionable garments and other prestigious things, having their eyes enormous charisma. However, thanks to television, print and social mobility, awareness of these benefits is high, and because so much they envy, and at the same time - a sense uschemlenosti and ejection. These reasons, and pushing some of them to commit thefts, robberies and robberies, as manifested in this bitterness, aggression and vandalism are a means of psychological compensation for the humiliation.

Key words: female criminality, the law enforcement system, criminal acts, social maladjustment.

MODERN PROBLEM OF CURRENT CAPITAL MANAGEMENT ON SERVICE ENTERPRISE OIL AND GAS BRANCHES TO INDUSTRY

© 2015 Vetrova Elena Nikolaevna
Doctor of Economics, Professor of Chair of Economics and Enterprise Management
© 2015 Kamaliev Rafael Raifilovich
St. Petersburg State University of Economics
Sadovaya str., 21, St. Petersburg, Russia, 191023
E-mail: vetrovaelenik@gmail.com, rafael161@yandex.ru

The paper presents an overview of the main factors of influence on activities of service companies in General, and their policy formation and management of working capital, in particular. The conclusion is made about necessity of development and application of models in the management of working capital, which would ensure an integrated approach to the selection and justification of target (desired) state of an enterprise.

Key words: circulating assets, working capital management, profitability of current assets, current liquidity.

The factors that have a direct impact on the activities of the companies:
- legal integration and the dependence of the service company from the customer (50 % of services service divisions of vertically integrated oil companies)

- the market of services in the oil and gas industries is a buyer's market, that is on a small number of major oil and gas companies have a large number of service companies, and offers from the sellers exceeds the demand from buyers

- the complexity of production conditions of oil and gas requires service companies to increase investment in the development of new technologies and ensure their implementations, as well as maintaining existing fixed assets at an acceptable level

- the heterogeneity of services provided and work performed

- seasonality of activity of the enterprises of the oil and gas industries

Factors determining the efficiency of working capital management

- investments

- mismanagement of the elements of current assets

- formation of optimal structure of financing sources

Can be divided decisions in the area of the WALK into two parts - decisions (activities) of the strategic and tactical nature. Strategic require the participation of state institutions and other actors of market relations. Tactical-level solutions of the service companies.

To resolve issues of tactical level is necessary to develop adequate information-analytical algorithm (methodical approach) of decision making in the processes of working capital management.

The authors of this article are of the view that such an algorithm should be assessed and the planning of such indicators of efficiency of working capital management, profitability of current assets, current liquidity, and turnover of current assets. This should be the proposed criteria values of indicators that will allow management to clearly evaluate the effectiveness of interventions in achieving stated objectives and to develop management decisions for the whole set of indicators included in the model.

**TRANSFORMATION MODEL OF DEVELOPMENT WAREHOUSE REAL ESTATE MARKET
RUSSIA IN 2014-2015: IDENTIFICATION OF POST-CRISIS GROWTH IMPERATIVES**

© 2015 Filtsev Sergey Alexandrovich
Rostov State Economic University
Bolshaya Sadovaya str., 69, Rostov-on-Don, Russia, 344002
E-mail: filcev@inbox.ru

The author reveals and substantiates the causes and conditions of the current transformation of the inertial-crisis model of development warehouse real estate market in Russia, the worsening macroeconomic crisis, which in the period 2014-2015,. It forms the transition to the new path of more sustainable development of the warehouse with the weakening of its speculative component. This is a fundamental renewal of the imperatives of the market and the formation of a new model of growth. The latter will be fundamentally different from the old warehouse development transition into a new phase of development.

Key words: warehouse development, market model, the capitalization rate, retail, funding, built-to-suit.

The paper presents a comprehensive study of preconditions and conditions of the current transformation of the inertial-crisis model of development warehouse real estate market in Russia. The author shows that the development of the speculative market warehouses in Russia for many years supported the growth of end-use and system tied to a related business (retail, logistics, distribution, production), which ensures the growth of the market and the absorption is not always quality, but permanently expensive warehouse space.

However, the crisis of 2008-2009. and the current crisis of 2014-2015,. in fact terminated the path of extensive growth of the market, turning it back on track better and more professional, less speculative development.

The author provides a brief periodization of the development of the market and identifies a number of changes, limiting the possibility of prolongation of the previous model of growth and the need to move to a new less speculative. The important conclusions of the article, empirically verified data is an indication of the critical dependence of the dynamics of the market warehouses from macroeconomic conditions, which will retain its relevance in the nearby future.

Housing partnership is a form of exercise of public services households. In the Smolensk region HOA has not yet been widely adopted. The proposed article considered obstacles to the creation of the HOA in the Smolensk region and identified the preconditions conducive to the revitalization of the process.

Key words: the homeowners Association, direct manipulation, management company, communal utilities, home improvement apartment house.

To study the existing methods of management of apartment houses, the options utility supplies to households, multi-family homes and customer satisfaction in their existing homes forms of governance was carried out a questionnaire survey, which was attended by 125 people. Of these, 44 per cent were living in Safonovo urban settlement, 12 % in Yartsevo settlement, 36 % in Dorogobuzh urban settlement, 8 % - in the urban district of Desnogorsk, 4 % in Gagarin settlement.

Based on the results of the conducted questionnaire survey it can be noted that in most cases the management of apartment houses is carried out by the management company. Even having a private form of apartment ownership, the respondents did not show activity in the control house. Some consumers are not aware of what organization they pay for the services they receive and how contracts for these services. Some respondents enters into such agreements independently. This fact suggests that not all management companies perform the requirements of the Housing code of the Russian Federation under which they are obliged to conclude contracts with suppliers of utility resources. Many respondents noted the complex nature of the activities serving them of managing companies and homeowners associations, along with management provide services for the maintenance of an apartment building almost without involvement of contractors.

To activate the involvement of households in the process of creating the HOA and other forms of management of apartment houses should:

- 1) conducting explanatory work among the population about the features and benefits of the creation of homeowners associations or self-service home;
- 2) the training population on the order of creation of the HOA and in its legal registration;
- 3) development, with the participation of local government, order of holding General meeting of inhabitants of the MCD;
- 4) the introduction of standards and rules for the management of MCD, including the order of conducting and storage of technical documentation;
- 5) the dissemination of "good practices" on the activities of the HOA.
