STATE AND LAW. LEGAL SCIENCE

THEORY AND HISTORY OF STATE AND LAW; HISTORY OF DOCTRINES ABOUT LAW AND STATE

THE ACTIVITY OF PROSECUTORS IN THE SPHERE OF PROTECTION OF PRIVATE PROPERTY RIGHTS LAWS

© 2016 But Nadezhda Dmitrievna

Doctor of Jurisprudence, Head of the Department of the Research Institute
Academy of the Prosecutor General's Office of the Russian
15, 2nd Zvenigorodskaya, Moscow, 123022, Russia
E-mail: ndbut@mail.ru

Prosecutors are endowed with universal law office complex, providing ample opportunities to curb violations of the protection of private property rights laws, as well as to create the necessary legal framework in this area. It is the prosecutor's office involved in law-making, procedural and supervisory powers through which prosecutors successfully protect the right of private property relations in different spheres.

Key words: prosecutor, powers, private property, protection, entrepreneur.

Discusses the features of the organizational-economic mechanism of management of innovative activity of enterprises in the petrochemical industry. Organizational-economic mechanism includes the purpose and objectives of management, elements, factors and criteria of efficiency of functioning.

Key words: innovation, organizational and economic mechanism, management, innovation activity, innovation activity, internal and external factors of influence, the principles of model construction.

**ASSESSMENT OF VALUE CHAIN INNOVATIVE VALUE
IN CORPORATIONS**

© 2016 Mishchenko Andrey Alexandrovich
Deputy Chief
CJSC “Institute of Materials Science”
4, b. 2, 4806 travel, Zelenograd, Moscow, 124460, Russia
E-mail: andrewmish@mail.ru

The theoretical significance of the study lies in broadening and deepening the scientific understanding of the formation and implementation of value chain innovative value. The results help to build a theoretical and methodological framework for further research on the problem of estimation of the value chain innovative value. The practical significance of the research consists in the development and application of evaluation method of value chain innovative value.

Key words: the value chain innovation value, stepwise evaluation, effectiveness, innovation in the supply chain.

Innovation in the aspect of the business model of the organization focused on the formation of value chain innovation value (innovation in supply chain, value proposition, target consumer group), which are in turn a structure and internal consistency of the chain. Since under national law (JSC, CJSC, LLC) have the status of corporations, the key elements of their system “assessing innovations” - a chain of creation of innovative value. Objective assessment of value chain innovative value in corporations is becoming increasingly important, contributing to the effective implementation of their innovation activities, which indicates the relevance of the study.

The purpose of the study was to develop a method of assessing the value chain of innovative values, which provides comprehensive step-by-step evaluation of the innovation (the generation of quality ideas through a process of diffusion, transformation, and distribution).

Subject of research - the process of creation and evaluation of value chain innovative value in organizations.

The object of research and commercial organisations involved in innovative activities.

Theoretical and methodological basis of research works of Russian and foreign scientists, specialists-practitioners, the Oslo Manual, and also materials of periodicals in the field of innovation

assessment of business entities. Methodological basis of research are: systematic, logical, situational, process scientific approaches to the study of the creation of chain value innovation in organizations. As the instruments were used General scientific methods: inductive, deductive, analysis, synthesis, detail, synthesis, systems thinking, analytical, method of expert estimations.

The theoretical significance of the study lies in broadening and deepening the scientific understanding of the formation and implementation of value chain innovative value. The results help to build a theoretical and methodological framework for further research on the problem of estimation of the value chain innovative value.

The practical significance of the research consists in the development and application of evaluation method of value chain innovative value. Method of assessment value chain innovation value is applied in the practical activity of JSC “SevKavNIPIgaz”, LLC “Anda technology” and in organizations included in the business incubator of Zelenograd.
