#### **THE MECHANISMS OF UNEQUAL EXCHANGE IN THE SYSTEM OF RUSSIAN LAW**

© 2016 Pavlov Vladimir Pavlovich

Doctor of Jurisprudence, Professor of Civil Law,  
Professor of Business Law and Corporate Law  
Financial University under the Government of Russian Federation  
49, Leningradsky avenue, Moscow, 125993, Russia  
E-mail: elena-mikhaylovna@ya.ru

The authors of the Civil code of Russian Federation defined its value in the system of normative acts as the "Economic constitution of Russian FEDERATION". Analysis of the systems of positions envisaged in this document allows to deduce the change of having a special purpose options in the direction of development of economy, happening from 1990. Such, if Civil code of RSFSR 1964 straight oriented on development of economy by creation of new material and non-material welfares

for satisfaction of necessities of citizens and exactly inlaid this maintenance in a concept “profit”, then Civil code of Russian FEDERATION 1994 gives a concept a “profit” not economic, but Chrematistik value of “profit” got a sole proprietor as a result of non-equivalent exchange. In article shown mutually agreed-upon conditions is in-process having a special purpose orientation and mechanisms of influence of modern legislation on economy, that objectively assist development of the crisis phenomena in the economy of country.

*Key words:* economy, Chrematistik, right, non-equivalent exchange, profit.

The method of forecasting of dynamics of economic indicators on the basis of the device of the multiresolution analysis allowing to extrapolate effectively non-stationary stochastic processes in conditions of aprioristic uncertainty is offered. The results of computing experiment showing that in comparison with the methods applied now the offered method allows to increase forecast accuracy are given.

*Key words:* multiresolution analysis, non-stationary stochastic processes, aprioristic uncertainty, the extrapolating function.

**ECONOMIC-MATHEMATICAL MODELING OF THE MECHANISM  
OF OUTSOURCING**

Research objective is development of scientific and methodical and practical recommendations about development of the organizational and economic mechanism of outsourcing as instrument of strategy of the centralized service of IT infrastructure and technology of communication in Russian Armed Forces. The technique of the choice of the supplier of IT services in Russian Armed Forces in the context of functional strategy of outsourcing of the service organization based on a complex criteria grade of the outsourcer in subject domains taking into account confidential specifics of the defensive sphere is also developed. All security agencies of the Russian Federation (MO Russian Federation, Ministry of Internal Affairs, FSB, Ministry of Emergency Situations, FSO, FDSC, FSIN) can apply this research at the choice of the outsourcer of services.

*Key words:* outsourcing, strategy, strategic management, functional strategy, economic and mathematical modeling, IT services, linear programming model.

The national health system in the developed countries is the most important integrated part of the state policy, which provided formation of the life quality and human capital. In conditions of existing funding gap in health service, the determining factor becomes condition of improvement the cost effectiveness for medical help in the system of CHI. This article discusses the methodological approaches and practical solutions to achieve clinical economics balance of the regional public health.

*Key words:* Health Economics, medical service payment, diagnosis-related groups, medical help funding, clinical economics balance.

Studying diversity type of the national health systems organizations in their continuous development and changes can be noted the evolving basic goal - ensuring the positive dynamics of the human population residing in the territory of the state (less: a group of states).

And the fact that historically for a different organizational and economic national health models has been used different methods of achieving clinical and economic balance, allow to identify and use in domestic practice the organizational and resource health components that provide the conditions for obtaining life-saving public health services, medical technologies and medicines.

Currently, the most economically developed countries use hybrid organizational and economic models of national health systems.

The paper deals with methodological approaches to sales system and transition to the process management in enterprises for the production of steel pipes and shaped products with foamed polyurethane thermal insulation in protective sheath. In the article we can see the analysis of existing concepts of the sales system, developed by Russian and Western economists, as well as a new concept of sales system, taking into account industrial peculiarities of the enterprises for the production of steel pipes and shaped products with foamed polyurethane thermal insulation in protective sheath. The authors proved the necessity of development of sales management methods for the enterprises under customer orientation with four key aspects.

*Key words:* Sales system, the concept of customer orientation, business process, process approach, the method of pre-sales technical analysis, the method of the introduction of companies' rating.
