Social security is a guarantee of modern social environment which ensures improvement of health, education, living and labor conditions, increase of individual income and competitive ability of people. Establishment of middle class is the basis for development of socialized market economy. Currently 60% of Russian people hardly live from paycheque to paycheque, 12,6 % are poor people. In 2017 1/3 of the total population is 65-years old people. In developed countries with market economy 60-80% of the total population is middle class which ensures economic and social security of the country. In 2015 in Russia middle class contained 27,7 m people. Only 7,6 m citizens were the core of meddle class, i.e. they had stable financial status, property and well-paid employment.

Keywords: social security, middle class, Gini coefficient, pension system, segregation of society (rich and poor), minimal salary, minimal cost of living, differentiation of income, social policy aimed on poverty and inequality reduction.

The North Caucasus region has great prospects to become an important node of complex transcontinental transport systems along the South-North and East-West routes. The North Caucasus as the Eurasian borderland has become the center of large-scale events and processes of world-historical significance. It was here that the multi-complex nodes of local, regional and global interests were established. All this makes the Caucasus-Caspian regional system of political and economic relations an important crossroads for several large-scale projects requiring cooperation of the countries of the whole continent.

Key words: geo-economics, geopolitics, energy resources, strategic planning, cross-border cooperation.

Анализ тенденций регионального развития Республики Казахстан

© 2015 Вечкинзова Елена Анатольевна
кандидат экономических наук, доцент
Центрально-Казахстанский университет “МГТИ-Лингва”
470061, Республика Казахстан, г. Караганда, пр. Бухар-Жырау, д. 12
E-mail: mail@mail.ru

Анализ динамики ВРП Республики Казахстан за 1998-2007 гг. проведен в контексте обеспечения устойчивости развития регионов. В этой связи динамика экономического развития оценивалась системой индикаторов, что позволило выявить сущность происходящих процессов в регионах и определить наиболее целесообразные направления государственного регулирования, обеспечивающие устойчивый экономический рост.

Ключевые слова: регион, экономический рост, специфика развития, система индикаторов, государственное регулирование.
