The subject of this article is the study of theoretical and practical ideas about the legal regulation of drivers of public administration development; consideration of new trends in the transformation of public administration in the context of the strategic development of the Russian Federation. The topic of the article reflects the transformation of the modern system of state and municipal government in terms of the characteristics of the international and Russian drivers of its transformation; New points of growth management and features of legal regulation. The purpose of this article is to identify at the present stage international and national drivers of public administration transformation, the place and role of the state in this process; features of the implementation of new state development strategies. The methodology of this work has made up comparative, formal legal, analytical methods. The results of the work are the formulation of features of public administration. The scope of the work includes a system of state and municipal management. The findings of the study can be used to further improve the legal regulation and practice of applying new strategies in public administration.

Key words: new strategies of state and municipal management, international and national drivers of public administration transformation.

INTERNATIONAL LAW; EUROPEAN LAW

**ISSUES OF IMPLEMENTATION OF ACTS OF THE INTERNATIONAL CIVIL
AVIATION ORGANIZATION IN THE RUSSIAN FEDERATION**© 2018 **Vavilov Nikita Sergeevich**PhD in Law, Senior Lecturer at the Department of Civil Law and Law Faculty Process
Mari State University

1, Lenina Square, Yoshkar-Ola, 424000, Republic of Mari El, Russia

E-mail: nikitlawyer@rambler.ru

The influence of international law on domestic law continues to remain a hot topic in the current unstable global political environment. Today, civil aviation is a dynamically developing industry, which is one of the most difficult in matters of human-machine interaction. The subject of this article is the legal acts of the International Civil Aviation Organization, as well as their implementation at the level of the Russian Federation. The article analyzes domestic regulatory acts adopted on the basis of ICAO standards and practices, concludes that there is sufficient legal regulation of ICAO activities in the Russian

Federation. The methodological basis of the study was a comprehensive, systematic approach to the analysis of the implementation processes of ICAO acts in Russia. In the course of the study of the status, powers and activities of ICAO, the processes of fulfillment of the prescriptions of the Chicago Convention, the general philosophical method, general scientific methods of cognition (dialectical, systemic, analysis and synthesis, induction and deduction), as well as private scientific methods (comparative legal, historical – legal, sociological, system-functional, statistical, theoretical-prognostic methods). Given the almost complete lack of research on the subject of the International Civil Aviation Organization, it seems relevant to consider the legal aspects of the implementation of its acts in the Russian Federation.

Key words: International Civil Aviation Organization, national legal system, Russian Federation, regulatory act, implementation, international standard, recommended practice, international treaty.

DIALECTICS (LOGIC) OF K. MARX'S "CAPITAL": TO THE QUESTIONS OF INTERPRETATION

© 2018 Sychev Nikolay Vasilievich

Doctor of Economics, Professor

Institute of Economics of the Russian Academy of Sciences

32, Nakhimovski prospect, Moscow, 117218, Russia

E-mail: niks.52@mail.ru

Attention is focused on the need to create a systematic work on the dialectics (logic) of Karl Marx's "Capital", which is of key importance for the development of not only philosophy, but also political economy. Analyzed are conceptual ideas put forward by Soviet philosophers within the framework of two main directions oriented towards solving the problem posed, their inherent strengths and weaknesses. Reveals two main reasons that did not allow to create this work. Three very important circumstances stand out as regards the definition of the initial category of a socialist economy. The author's point of view on the issues under consideration is presented.

Key words: "Capital" by K. Marx, dialectical method, dialectics, logic, economic categories, objective logic, subjective logic, concrete, abstract, philosophy, political economy, productive forces, production relations, economic system.

In contrast to the decision – making within the framework of the standard client-service network in the health organization, which involves the centralization of information on the basis of which the decision is formed, the blockchain network (peer-to-peer decentralized network) makes it possible to avoid the influence of subjective factors, using only the simultaneous validation and verification of each element of the distributed registry system. That will improve the efficiency of doctors as a result of the release of working time.

Key words: distributed registry systems, value, division of labor, decision-making, validation, certification, digitalization.

Particularly relevant for urban areas, where an extensive network of engineering infrastructure, is the problem of housing and communal services. The analysis carried out in the article showed that in this area of urban life there are still a lot of unsolved problems. Today, the regulation of tariff policy requires deciding how to make utilities available to the population of the municipality without harming the interests of service providers. It is from these positions that the issue of increasing the efficiency of the tariff policy of housing and utility organizations and the choice of the form of relations between consumers, suppliers and

the administration of the city of Makhachkala, which is obliged to coordinate and regulate these relations, avoiding infringement of the interests of the parties, should be resolved.

Key words: housing and utilities complex, housing complex, utilities, Infrastructure, tariff policy.

The article presents the main results of the analysis of the potential of re-industrialization of the Russian Federation on the basis of 11 indicators characterizing the state of the manufacturing industries for the period 2005–2016. in the federal districts. This paper is a continuation of the study of the theory and practice of re-industrialization aimed at improving the efficiency of functioning and competitiveness of the Russian economy. In the context of the federal districts, the analysis allows us to conclude that there is a qualitative deterioration in both the actual state and the predicted development prospects of the manufacturing industries. As a result, there is a negative process of reducing the technological potential of re-industrialization in the economy of the Russian Federation. The proposed methodology can be used in assessing the potential of re-industrialization both in individual regions and in the Russian Federation as a whole.

Key words: re-industrialization, processing industries, matrix of processing industries, investments, federal districts, Volga Federal District.

At this stage of development of the market economy of the Russian Federation, the problem of

investment attractiveness of the socio-economic regional system is becoming increasingly important. The article analyzes various aspects of the investment activity of the Penza region for the period 2013–2017. A number of areas that contribute to strengthening the investment potential of the region are highlighted. The conclusions about the reasons for the decline in investment both in the economy of the Russian Federation as a whole and in the economy of the Penza region in particular are presented.

Key words: investment attractiveness, investment climate, investment potential, investments, region.

Department of Economics of the mineral and raw materials complex.
Russian State Geological Prospecting University named after Sergo Ordzhonikidze
25, Miklouho-Maklaya Street, Moscow, 117485, Russia

The real economy of the Russian Federation is largely oriented towards the use of minerals. At the same time, in recent decades the country has developed a situation in which replenishment of resources practically does not take place. This situation is fraught with serious problems both in the field of industrial production and in the social sphere. That is why the current state of affairs in the geological exploration industry, which provides the development potential of this sector of the economy, is of deep concern. The article considers the main reasons for the decline in the rate of reproduction of mineral resources and challenges faced by the exploration industry in its current development. Based on the analysis of these challenges and the main trends, a number of measures are proposed to ensure the progressive development of the exploration industry.

Key words: Minerals, resources, geological exploration, state regulation, investment attractiveness, reproduction of mineral resources.

MODERN ASPECTS OF INNOVATION ACTIVITIES IN THE FIELD OF MEDICAL SERVICES

© 2018 **Borisova Anna Konstantinovna**

Postgraduate Student of the Department of Entrepreneurship and Logistics

Russian University of Economics named after G.V. Plekhanov

36, Stremyanny Lane, Moscow, 117997, Russia

E-mail: ak.borisova@mail.ru

The necessity and expediency of innovative development of the medical services sector is recognized both in scientific research and at the legislative level. But the experience of introducing and developing innovations in the healthcare industry, as a whole, and in the country has not yet given the desired result, while on a global scale some of the positions characterizing the level of development have deteriorated altogether. Based on the analysis of trends and factors of innovative development of the medical services sector, as well as the essence of the innovative component of the development of the medical services sector at the present stage of socio-economic development, we consider expedient decision-making on optimizing the mechanisms of innovative development of the medical services sector as one of the links of the general innovative and economic development.

Key words: innovations, innovative development, medical services, criteria for innovation, medical efficiency, social efficiency, economic efficiency.

The article explores the possibilities of increasing the efficiency of the functional and financial and economic activities of higher education institutions through the activation of research and development. The most promising form of organizing scientific activity in the educational sphere at the level of the subjects of the Russian Federation with subsequent practical application of its results is the formation of scientific and educational clusters on the basis of higher educational institutions. The revealed peculiarities of the functioning of scientific and educational clusters on the basis of leading regional universities necessitated the development of an algorithm for their formation.

Key words: higher educational institutions, research activities, cluster, regional socio-economic development, social effect

PRO BONO – CORPORATE DEVELOPMENT DRIVER VOLUNTEERSHIP IN THE REGION

© 2018 Galchenko Svetlana Alekseevna

PhD in Economics, Associate Professor of the Department of Management
Kursk State University

The research is aimed at studying the practice of corporate volunteering in the regional economy, replicating best practices and innovative practices of socially responsible business. The aim of the study is to substantiate the idea of creating a Pro Bono platform based on an educational organization, for effective and mutually beneficial communications of stakeholders in the L 2 B. The expected results consist in justifying the feasibility of creating a pro bono platform, which will become a platform for outstaffing between the university and small businesses in the region.

Key words: socio-economic development, innovative development, social responsibility, investment attractiveness of the territory, environmental improvement, pro bono platform, small business entities, business processes, marketing, organizational structures, corporate volunteering, stakeholders.
